

Call for papers

PAC World Conference 2023

26 - 29 June 2023

Glasgow, UK

Protection, automation and control specialists from industry and academia around the world are invited to submit abstracts for the PAC World 2023 Conference on the following topics:

- 1. The Future of the electric power grid PAC challenges of today and tomorrow
- 2. PAC and Smart Grid
- 3. System analysis
- 4. Standardization and harmonization of system models
- 5. Wide area monitoring, protection and control systems (WAMPACS)
- 6. Wide area disturbances analysis and lessons learned
- 7. Visualization, situational awareness
- 8. Synchrophasors, applications and benefits
- 9. Communications and their applications
- 10. IEC 61850, tools, applications and benefits
- 11. Standard protocols and common data formats
- 12. Cyber security
- 13. Multifunctional Protection IEDs and their applications in transmission and distribution systems
- 14. Advanced protection, automation and control functions and applications
- 15. Centralized Substation Protection and Control
- 16. Adaptive protection
- 17. System Integrity Protection Schemes (SIPS)
- 18. Testing of intelligent devices, distributed functions and systems
- 19. Power quality
- 20. Automatic fault analysis
- 21. Substation automation
- 22. Distribution automation
- 23. Smart metering and Home automation
- 24. Impact of wind power on PAC
- 25. Distributed Energy Resources integration wind, solar, EV, storage
- 26. Asset management and condition monitoring
- 27. Engineering of protection, automation and control systems
- 28. Protection operation analysis and lessons learned
- 29. Power system education challenges for professionals and administrators
- 30. Standardization of protection, automation and control systems
- 31. Artificial Intelligence applications in PAC systems
- 32. Any other protection, automation and control related topic

The main goal of the conference is to bring together professionals in the fields of protection, automation, control, communications, DERs and other power system domains in order to learn about the latest developments in the industry and share experience and ideas how we can all work together to make the grid smarter in the most efficient way.

All abstracts should be around 500 words. The authors should keep in mind that the focus of their papers should be on presenting challenges, applications, solutions and ideas related to the above topics in a non-commercial and practical manner.

Abstracts should be submitted at https://pacworld.regfox.com/pacwc23-c4p

Papers accepted for oral presentation will be included in the program. Papers accepted for the poster session will also be included in the proceedings of the conference and used as backup for oral presentation.

Important dates (strictly enforced):

Abstracts deadline: 31 January 2023
Acceptance notification: 28 February 2023
Papers submission: 15 May 2023
